Data Optimization (Level 2 & 3 Enrichment)

ELEVATE YOUR NETSUITE EXPERIENCE WITH ADVANCED PAYMENT CAPABILITIES AND SOLUTIONS

Merchants today encounter various payment challenges, such as fragmented processes, manual data entry, reconciliation difficulties, security and compliance issues, and cash flow management. A critical concern is managing and reducing Days Sales Outstanding (DSO), which directly affects liquidity and daily financial health.

Our NetSuite integration addresses these challenges by providing a comprehensive payment solution that enhances efficiency, security, and customer satisfaction. By streamlining payment processes and automating reconciliation, our solution helps merchants reduce DSO, improving cash flow and financial planning, thereby supporting sustained business growth.

With our NetSuite integration, you gain support for ACH, card present transactions (swipe, chip, tap), ecommerce, and invoiced payments. This enables seamless in-transaction payment processing across sales orders, invoices, customer payments, card management, voids, and refunds.

We are excited to announce the upcoming AR Automation features, which will include a full customer portal and anonymous payment links.
